Even when a history writer would have wanted to celebrate, maybe the greatest European power (on land), namely the Austrian Empire, he certainly would not had chosen the terrible year 1809. What for the military apparatus in Vienna could have been a beginning of a Great Military Reform, the triumph of the Generalissimus Archduke Charles, became one of the worst nightmares of Habsburg history. In short, after a series of unfortunate events and bad military conduct, Austria disappeared from the European scene, losing further important territories but, above all, losing its mighty armies. The author chooses to tell about that period, evaluating the military organization, starting from the recruitment, up to the details of the various units, because that army, was the largest army fielded by Austria before the Great War: man told about 600,000 men, including the Levies of regional volunteers, called Landwehr (in the territories of the Austrian Crown) and Insurrectio (in the territories of the Crown of St. Stephen).... ..At the end, Austria entered into war with the most powerful military force of the whole Napoleonic Period (in numbers of fighters), an effort which hardly seemed possible and which surprised the world. Unfortunately its three armies (and the Landwehr) did not surprised Bonaparte, who kicked.

The Second Philip K. Dick MEGAPACK®: 13 Fantastic Stories

Paths out of the Apocalypse uses violence as a prism through which to investigate the profound social, cultural, and political changes experienced by (post-) Habsburg Central Europe during and immediately after the Great War. It compares attitudes toward, and experiences and practices of, physical violence in the mostly Czech-speaking territories of Bohemia and Moravia, the German-speaking territories that would constitute the Republic of Austria after 1918, and the mostly German-speaking region of South Tyrol. Based on research in national and local archives and copious secondary literature, the study argues that, in the context of total war, physical violence became a predominant means of conceptualizing and expressing social-political demands as well as a means of demarcating various notions of community and belonging. The authors apply an interdisciplinary understanding of violence informed by sociological and psychological theories as well as by rigorous empirical historiographical approach. First, they examine the most severe kind of physical violence - murder - against the backdrop of shifting scientific and media discourses during the war and its immediate aftermath. Second, the authors use numerous cases of collective violence, ranging from less serious everyday conflicts to massive hunger demonstrations and riots, to unravel its 'language', thus deciphering the attitudes and values shared among an ever-growing group of perpetrators. Paths out of the Apocalypse thus fundamentally rethinks some key topics currently debated in the scholarship on early twentieth-century Central Europe, the First World War, violence, nationalism, and modern European comparative social and cultural history.
