The US healthcare system faces numerous difficulties: uncontrolled increases in costs; major access problems; doctor shortages; closing practices; inefficiencies; decreasing revenues; shrinking bottom lines; large numbers of uninsured and underinsured patients; and the upcoming increased demands in service posed by the Affordable Care Act. As a result, many physicians and health care organizations are turning to group

visits to address these problems. While Dr. Noffsinger's textbook *Running Group Visits In Your Practice* is the cornerstone reference on designing, implementing and running shared medical appointments (SMAs) in one's practice, it lacks the simplicity and practicality that clinicians are looking for to start their own SMA programs. *The ABCs of Group Visits* is a practical, streamlined and step-by-step guide focused on the implementation aspects of group visits. Healthcare professionals at every level are looking for alternate ways to deliver high quality care at lower cost, and it is clear to many that group visits provide a care delivery model that will address many of today's critical challenges. *The ABCs of Group Visits* quickly provides a solution for your busy practice.

Cassini-Huygens was the most ambitious and successful space journey ever launched to the outer Solar System. This book examines all aspects of the journey: its conception and planning; the lengthy political processes needed to make it a reality; the engineering and development required to build the spacecraft; its 2.2-billion mile journey from Earth to the Ringed Planet and the amazing discoveries from the mission. The author traces how the visions of a few brilliant scientists matured, gained popularity and eventually became a reality. Innovative technical leaps were necessary to assemble such a multifaceted spacecraft and reliably operate it while it orbited a planet so far from our own. The Cassini-Huygens spacecraft design evolved from other deep space efforts, most notably the Galileo mission to Jupiter, enabling the voluminous, paradigm-shifting scientific data collected by the spacecraft. Some of these discoveries are absolute gems. A small satellite that scientists once thought of as a dead piece of rock turned out to contain a warm underground sea that could conceivably harbor life. And we now know that hiding under the mist of Saturn's largest moon, Titan, is a world with lakes, fluvial channels, and dunes hauntingly reminiscent of those on our own planet, except that on Titan, it's not water that fills those lakes but hydrocarbons. These and other breakthroughs illustrate why the Cassini-Huygens mission will be remembered as one of greatest voyages of discovery ever made.

## Let's Visit: Northern Ireland

During these visits with Granny there were occasions to teach, visit the library, visit the mall, and other activities at home like baking pretzel. Physical activities like taking walks in the mall, window shopping, and making comments on what they saw made the outing more entertaining. Rides in the toy cars were very exiting too. At home they planted maize grains and bean seeds in two cups, and produced two seedlings, which were in harmony with the new leaves that were appearing on the trees outside as it was Spring time. Rose was school age, but there was no room for her yet in the schools.
