## **Polyptych: Adaptation, Television, and Comics**

Through each of its chapters, 'Polyptych: Adaptation, Television, and Comics' examines the complex dynamics of adapting serialized texts. The transmedial adaptation of collaborative and unstable texts does not lend itself to the same strategies as other, more static adaptations such as novels or plays. Building off the foundational work of Linda Hutcheon and Gérard Genette, Polyptych considers the analogy of adaptation as a palimpsest—a manuscript page that has been reused, leaving traces of the previous work behind—as needing to be reevaluated. A polyptych is a multi-panel artwork and provides a new model for analyzing how adaptation works when translating collaborative and unstable texts. Given that most television and comic books are episodic and serialized, and considering that both media are also the cumulative work of many

artists, this book offers a series of distanced readings to reassess how adaptation works in this field. Comic book adaptations on television are plentiful and are nearly completely ignored in critical discussions of adaptation. This collection focuses on texts that fall outside the most common subjects of study among the corpus and contributes to expanding the field of inquiry. The book features texts that are subjects of previous academic interest, as well as studies of texts that have never before been critically considered. It also includes an appendix that provides the first list of comic book adaptations on North American television. 'Polyptych' is a unique and timely contribution to dynamic and growing fields of study. The book will be of interest to scholars and researchers in the fields of Comic Studies, Adaptation Studies, and Critical Media Studies more broadly, as well as to students undertaking courses on these subjects. It will also appeal to comic book and pop culture fans who wish to expand their knowledge on the subject.

## **Cartoon Cultures**

From 1993 to 2003, exports of Japan's cartoon arts tripled in value, to \$12.5 billion. Fan phenomena around the world - in U.S. malls, teen girls flock to purchase the latest Fruits Basket graphic novel; in Hungary, young people gather for a summer «cosplay» (costume dress-up) event - illustrate the global popularity of manga and anime. Drawing on extensive research and more than 100 original interviews, Anne Cooper-Chen explains how and why the un-Disney has penetrated nearly every corner of the planet. This book uses concepts such as cultural proximity, uses and gratifications, and cultural variability to explain cross-cultural adaptations in a broad international approach. It emphasizes that overseas acceptance has surprised the Japanese, who create manga and anime primarily for a domestic audience. Including some sobering facts about the future of the industry, the book highlights how overseas enthusiasm could actually save a domestic industry that may decline in the contracting and graying country of its birth. Designed for courses covering international mass media, media and globalization and introduction to Japanese culture, the book is written primarily for undergraduates, and includes many student-friendly features such as a glossary, timeline and source list.

## **Race to Win**

The media industries in the United States and Japan are similar in much the same way different animal species are: while a horse and a kangaroo share maybe 95% of their DNA, they're nonetheless very different animals-and so it is with manga and anime in Japanese and Hollywood animation, movies, and television. Though they share some key common elements, they developed mostly separately while still influencing each other significantly along the way. That confluence is now accelerating into new forms of hybridization that will drive much of future storytelling entertainment. Packed with original interviews with top creators in these fields and illuminating case studies, *Manga and Anime Go to Hollywood* helps to parse out these these shared and diverging genetic codes, revealing the cross-influences and independent traits of Japanese and American animation. In addition, *Manga and Anime Go to Hollywood* shows how to use this knowledge creatively to shape the future of global narrative storytelling, including through the educational system. Northrop Davis paints a fascinating picture of the interrelated history of Japanese manga/anime and Hollywood since the Meiji period through to World War II and up to the present day - and even to into the future.

## **Yoshitaka Amano: The Illustrated Biography-Beyond the Fantasy**

RACER. INNOVATOR. CELEBRITY. MOGUL. CHAMPION. This is the first biography of the short but exciting life of Albert Champion—record-setting bicyclist and motorcyclist, daredevil racecar driver, early automobile innovator, charismatic ladies' man, and celebrity of the Jazz Age. Though most Americans have heard of the companies Albert Champion founded—ACDelco and Champion Spark Plug—few know much about the charismatic man behind them. Like a Richard Branson of the early 20th century, or an Evel Knievel with a business degree, Champion was a powerhouse whose life was defined by both speed and success.

Champion rose from poverty in Paris to great wealth and fame in both his native France and the United States. As a bicycle racer, Champion set more than a hundred world records. When the urban speed limit was 8 mph, he was the first ever to drive a motorcycle a mile under a minute. A car-racing crash snapped a leg bone that kept him in traction for eleven weeks. Undeterred, he hobbled out of the hospital on crutches and recovered to win the French national cycling championship. Champion invested his prize money to become a tycoon in the new and revolutionary American auto industry, working closely with the leading players and amassing thirty US. His contemporaries included Charles Lindbergh, who endorsed Champion's product by saying, \"AC Spark Plugs kept my engine running perfectly.\"; Louis Chevrolet, whom Champion backed financially until it came out that he was trying to seduce Chevrolet's wife, which led to a fight and the end of their friendship; and William Durant, founder of a \"new holding company\" called General Motors. A notorious ladies' man, Champion's many dalliances were fodder for the papers and finally ended in a love triangle that resulted in his death under mysterious circumstances.
