ballets of Lully in the court of Louis XIV to popular ballads of the nineteenth century; from eighteenth-century British-American theater to the musical theater of Irving Berlin; from chamber music by Dvořák to film music for Apaches in Hollywood Westerns. Michael Pisani demonstrates how European colonists and their descendants were fascinated by the idea of race and ethnicity in music, and he examines how music contributed to the complex process of cultural mediation. Pisani reveals how certain themes and metaphors changed over the centuries and shows how much of this “Indian music,” which was and continues to be largely imagined, alternately idealized and vilified the peoples of native America.

Bridging environmental and Indigenous studies and drawing on critical geography, spatial theory, new materialist theory, and decolonizing theory, this dynamic volume examines the sometimes overlooked significance of place in social science research. There are often important divergences and even competing logics at work in these areas of research, some which may indeed be incommensurable. This volume explores how researchers around the globe are coming to terms - both theoretically and practically - with place in the context of settler colonialism, globalization, and environmental degradation. Tuck and McKenzie outline a trajectory of critical place inquiry that not only furthers empirical knowledge, but ethically imagines new possibilities for collaboration and action. Critical place inquiry can involve a range of research methodologies; this volume argues that what matters is how the chosen methodology engages conceptually with place in order to mobilize methods that enable data collection and analyses that address place explicitly and politically. Unlike other approaches that attempt to superficially tag on Indigenous concerns, decolonizing conceptualizations of land and place and Indigenous methods are central, not peripheral, to practices of critical place inquiry.

The most wide-ranging book ever published on gender-selective mass killing, or "gendercide," this collection of essays is also the first to explore systematically the targeting of non-combatant "battle-age" males in various wartime and peacetime contexts. Representing such fields as sociology, political science, psychology, queer studies, and human-rights activism, the contributors explore themes and issues outlined by editor Adam Jones in the book's opening essay. In that article, which provoked considerable debate when it was first published in 2000, Jones argues that throughout history and around the world, the population group most consistently targeted for mass killing and state-backed oppression are non-combatant men of roughly fifteen to fifty-five years of age. Such males, Jones contends, are typically seen as "the group posing the greatest danger to the conquering force." Jones's article also examines the use of "gendercidal institutions"--such as female infanticide, witch-hunts, military conscription, and forced labor--against both women and men. The subsequent essays--some original, some drawn from a special issue of the Journal of Genocide Research and other sources--expand, diversify, and criticize this framing of gendercide. They range from a sophisticated theoretical analysis of gendercide to in-depth treatments of such topics as the Rwandan genocide of 1994, the gendercidal oppression of young African American males, the predicament of gays and lesbians in the face of increasing biotechnological manipulation of human behavior, and the psychology of shame and humiliation underlying gendercides against both sexes. Still other articles take issue with Jones's theories of gendercide, or explore how human-rights organizations have defined, documented, and responded to gendercide and other sex-specific atrocities. A closing essay considers the relevance of feminist and men's studies literatures for the study of gendercide.

It is difficult to find justice-centered books geared specifically for community college practitioners interested in achieving campus wide educational equity. It is even more difficult to find a book in this vein written, exclusively, by community college practitioners. *Minding the Obligation Gap in Community Colleges and Beyond* is just that: a concerted effort by a cross-representational group of community college practitioners working to catalyze conversations and eventually practices that attend to the most pressing equity gaps in and on our campuses. By illuminating the constitutive parts of the ever-increasing obligation gap, this book offers both theory and practice in reforming community colleges so that they function as disruptive technologies. It is our position that equity-centered community colleges hold the potential to call out, impede, and even disrupt institutionalized policies, pedagogies, and practices that negatively impact poor, ethno-racially minoritized students of color. If you and your college is interested in striving for educational equity campus-wide please join us in this ongoing conversation on how to work for equity for all of the students that we serve.

NATIONAL BESTSELLER • “A fire-breathing, righteous attack on the culture of superprivilege.”—Michael Wolff, author of the #1 New York Times bestseller *Fire and Fury*, in the New York Times Book Review

NOW WITH NEW REPORTING ON OPERATION VARSITY BLUES In this explosive and prescient book, based on three years of investigative reporting, Pulitzer Prize winner Daniel Golden shatters the myth of an American meritocracy. Naming names, along with grades and test scores, Golden lays bare a corrupt system in which middle-class and working-class whites and Asian Americans are routinely passed over in favor of wealthy white students with lesser credentials—children of alumni, big donors, and celebrities. He reveals how a family donation got Jared Kushner into Harvard, and how colleges comply with Title IX by giving scholarships to rich women in “patrician sports” like horseback riding and crew. With a riveting new chapter on Operation Varsity Blues, based on original reporting, *The Price of Admission* is a must-read—not only for parents and students with a personal stake in college admissions but also for those disturbed by the growing divide between ordinary and privileged Americans. Praise for *The Price of Admission* “A disturbing exposé of the influence that wealth and power still exert on admission to the nation’s most prestigious universities.”—The Washington Post “Deserves to become a classic.”—The Economist

Grace & Gumption

When *The World Rushed In* was first published in 1981, the Washington Post predicted, “It seems unlikely that anyone will write a more comprehensive book about the Gold Rush.” Twenty years later, no one has emerged to contradict that judgment, and the book has gained recognition as a classic. As the San Francisco Examiner noted, “It is not often that a work of history can be said to supplant every book on the same subject that has gone before it.” Through the diary and letters of William Swain--augmented by interpolations from more than five hundred other gold seekers and by letters sent to Swain from his wife and brother back home--the complete cycle of the gold rush is recreated: the overland migration of over thirty thousand men, the struggle to “strike it rich” in the mining camps of the Sierra Nevadas, and the return home through the jungles of the Isthmus of Panama. In a new preface, the author reappraises our continuing fascination with the “gold rush experience” as a defining epoch in western--indeed, American--history.

Adapting Curriculum to Bridge Equity Gaps Towards an Inclusive Curriculum

"There's a long drive. It's gonna be. I believe. The Giants win the pennant. The Giants win the pennant. The Giants win the pennant. The Giants win the pennant." -- Russ Hodges, October 3, 1951 On the fiftieth anniversary of "The Shot Heard Round the World," Don DeLillo reassembles in fiction the larger-than-life characters who on October 3, 1951, witnessed Bobby Thomson's pennant-winning home run in the bottom of the ninth inning. Jackie Gleason is razzing Toots Shor in Leo Durocher's box seats; J. Edgar Hoover, basking in Sinatra's celebrity, is about to be told that the Russians have tested an atomic bomb; and Russ Hodges, raw-throated and excitable, announces the game -- the Giants and the Dodgers at the Polo Grounds in New York. DeLillo's transcendent account of one of the iconic events of the twentieth century is a masterpiece of American sportswriting.

Here, in a single volume, is a selection of the classic critiques of the new Constitution penned by such ardent defenders of states' rights and personal liberty as George Mason, Patrick Henry, and Melancton Smith; pro-Constitution writings by James Wilson and Noah Webster; and thirty-three of the best-known and most crucial Federalist Papers by Alexander Hamilton, James Madison, and John Jay. The texts of the chief constitutional documents of the early Republic are included as well. David Wootton's illuminating Introduction examines the history of such American principles of government as checks and balances, the separation of powers, representation by election, and judicial independence—including their roots in the largely Scottish, English, and French new science of politics. It also offers suggestions for reading The Federalist, the classic elaboration of these principles written in defense of a new Constitution that sought to apply them to the young Republic.

The United States in Global Perspective

What is the "American Dream"? This book's author argues that contrary to what many believe, it is not achieving the wealth necessary to enter the top one percent but rather becoming members of the great middle class by dint of hard work and self-discipline. Americans of all classes consider themselves to be "middle class." There are Americans who by any objective standard should be considered poor who would insist they are middle class, just as other Americans who should be considered wealthy also insist they are middle class. Thinking of yourself and being thought of by others as middle class is the "American Dream" for tens of

millions of people. But an enduring problem of the American middle class is the worry that the "Dream" is coming apart—that forces are lurking in the shadows waiting to steal their progress and throw them back into "poverty." This thought-provoking reference explores a disparate multitude of issues associated with being middle class in America. It addresses a range of questions and subtopics, including the meaning of the term "middle class"; how middle class status is expressed by both the majority and the various minorities that make up the American mosaic; what economic pressures are bearing down on the middle class; and how economists and others attempt to make sense of the economic issues of the day. Readers will also better understand how political institutions and public policies are shaping the way the middle class views the world; how labor, housing, education, and crime-related issues have influenced the development and growth of the middle class; the norms of the middle class versus those of other classes in society; and the role of culture and media in shaping how members of the middle class view themselves—and how they are viewed by others. This two-volume set provides a comprehensive look at the American middle class that supports student research in economics, social studies, cultural studies, and political history. The content supports teachers in their development of lesson plans and assignments that directly align with the Common Core State Standards and the recommendations of the National Curriculum Standards for Social Studies (NCSS) with respect to all ten NCSS themes.

The Essential Federalist and Anti-Federalist Papers

The complete texts of the documents that tell the story of the clashes and compromises that gave birth to the United States of America. In 1787, these important questions and others were raised by such statesmen as Patrick Henry and John DeWitt as the states debated the merits of the proposed Constitution. Along with The Federalist Papers, this invaluable book documents the political context in which the Constitution was born. A trenchant analysis of how public education is being destroyed in overt and deceptive ways—and how to fight back In the “vigorous, well-informed” (Kirkus Reviews) *A Wolf at the Schoolhouse Door*, the co-hosts of the popular education podcast *Have You Heard* expose the potent network of conservative elected officials, advocacy groups, funders, and think tanks that are pushing a radical vision to do away with public education. “Cut[ing] through the rhetorical fog surrounding a host of free-market reforms and innovations” (Mike Rose), Jack Schneider and Jennifer Berkshire lay bare the dogma of privatization and reveal how it fits into the current context of right-wing political movements. *A Wolf at the Schoolhouse Door* “goes above and beyond the typical explanations” (SchoolPolicy.org), giving readers an up-close look at the policies—school vouchers, the war on teachers’ unions, tax credit scholarships, virtual schools, and more—driving the movement’s agenda. Called “well-researched, carefully argued, and alarming” by *Library Journal*, this smart, essential book has already incited a public reckoning on behalf of the millions of families served by the American educational system—and many more who stand to suffer from its unmaking. “Just as with good sci-fi,” according to *Jacobin*, “the authors make a compelling case that, based on our current trajectory, a nightmare future is closer than we think.”

Research Methods: The Basics

"In a post-Trump world, the right is still very much in power. Significantly more than half the world's population currently lives under some form of right-wing populist or authoritarian rule. Today's autocrats are, at first glance, a diverse band of brothers. But religious, economic, social and environmental differences aside, there is one thing that unites them - their hatred of the liberal, globalised world. This unity is their strength, and through control of government, civil society and the digital world they are working together across borders to stamp out the left. In comparison, the liberal left commands only a few disconnected islands - Iceland, Mexico, New Zealand, South Korea, Spain and Uruguay. So far they have been on the defensive, campaigning on local issues in their own countries. This narrow focus underestimates the resilience and global connectivity of the right. In this book, John Feffer speaks to the world's leading activists to show how international leftist campaigns must come together if they are to combat the rising tide of the right. A global Green New Deal, progressive trans-European movements, grassroots campaigning on international issues with new and improved language and storytelling are all needed if we are to pull the planet back from the edge of catastrophe. This book is both a warning and an inspiration to activists terrified by the strengthening wall of far-right power."
