Many strategic change efforts fail. And virtually all of them are harder than they need to be. Why is this? And what can we do to make change more likely to stick? Dr. Elsbeth Johnson, a former equity analyst and London Business School Professor now teaching at MIT, has spent a decade researching how to deliver strategic change in practice. Based on asking managers what they needed from leaders, rather than just asking leaders what they did, her resulting Step Up, Step Back approach challenges some of our most fundamental beliefs about how to lead change – and indeed, about what we even consider to be 'leadership'. The Step Up, Step Back approach suggests leaders need to step up and do more than they typically do in the early stages of the change – in specific ways and at specific times; and then step back and do less than they typically do in the later stages of the change – again, in specific ways, at specific times. The result is not only change that sticks, but empowered, motivated managers who can get on with delivering change, without needing ongoing input or cover from leaders. Using real-world examples of how to apply the science in practice, Step Up, Step Back gives you a roadmap for how to deliver strategic change in your organization.

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times
